Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/04 has been entered.

Claims 10-14 and 16-75 are allowable over the prior art of record and in light of applicant's argument.

The examiner has considered the IDS and has also entered the amendment filed on 9/20/04.

The petition to withdraw the application from issue after payment of issue fee has been granted.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 11, line 1 of claim 40, before (new) the apparatus according to Claim 27, please delete "40." and substitute -- 74. --;

On page 15, line 1 of claim 65, before (new) The apparatus according to claim 62, please delete "65." and substitute – 75. --.

The following is an examiner's statement of reasons for allowance: The prior art fail to teach a server method that is implemented to centrally manage a roaming operation for the remote mobile client and the remote mobile client can perform application layer, client-server interaction with a network application server when coupled to a first wireless network access point and later when coupled to a second wireless network access point. Furthermore, in another independent claim, the prior art fail to teach handoffs implementation to selected wireless access points supporting previously unknown air interface protocol features, the wireless terminal apparatus is configured to : perform a data transaction with the remote roam-management server to identify to the roam-management server a geographical location associated with the wireless terminal apparatus, and in response thereto, to obtain wirelessly at least one software module to a software radio processor ... wherein the at least one software module is received from the remote roam-management server to allow the wirelessly terminal apparatus to dynamically roam onto a network that uses a second air interface protocol, wherein a complete set of program code used to implement the second air interface protocol was not present in the wireless terminal apparatus prior to the handoff operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
